ABOUT US

ERPA TECHNOLOGY

Your Trusted Solution Partner in
Professional Display Systems

Since 1995, ERPA Teknoloji has been a **pioneer in industrial technology** through its domestic production capabilities and has established itself as a comprehensive solution center within the industry. Consistently ranked among **"Turkey's Top 500 IT Companies,"** ERPA Teknoloji has successfully delivered numerous projects domestically while also extending its services internationally through a well-established supply network across multiple regions.

As the company that established Turkey's first monitor and printer laboratory, ERPA Teknoloji has transformed its expertise in display technologies into innovative and locally developed products under the **TOCHI** brand. Today, TOCHI offers a comprehensive range of solutions, including videowalls, **digital signage**, kiosks, digital totems, smart bus stop displays, in-vehicle displays, in-vehicle PCs, defense industry displays, industrial monitors, panel PCs, mini PCs, and smart building systems. In addition to standard products ranging from 4.5 inches to 110 inches, ERPA Teknoloji has the capability to design and manufacture customized display solutions tailored to specific project requirements and dimensions.

Our products are designed for outdoor conditions and fully comply with **IP (dust and liquid) protection standards**. Our engineering strength and quality approach are backed by national and international certifications including **CE, TSE, TSE-HYB, Industrial Registry Certificate and Certificate of Domestic Goods**.

Our in-vehicle, smart bus stop and rail system solutions fully comply with **EMC and ECE R10** standards for electromagnetic compatibility, **EN 50155** for resistance to demanding temperature and vibration conditions, and **UN/ECE R118** for fire safety.

ERPA Teknoloji conducts all manufacturing operations in accordance with the **ISO 9001:2015 Quality Management System**, placing customer satisfaction and continuous improvement at the center of its processes. With its strong domestic manufacturing capabilities, engineering excellence, and innovative vision, ERPA Teknoloji continues to develop the technologies of the future.

While production activities are carried out at our facility on Basın Ekspres Avenue in Halkalı, İstanbul, R&D activities continue at AREL TEKMER and Dijitalpark Teknokent.

Digital Signage Displays

TOCHI Digital Signage Displays are modern digital communication solutions that deliver information, advertising and corporate content to target audiences in an effective, dynamic and engaging way. With centralized and remote management, content can be updated instantly, saving time in operational processes while reducing printing and installation costs.

**“BRING INFORMATION,
ADVERTISING AND
IMPACT**

”

TOCHI Digital Signage Displays offer modern display solutions that strengthen digital communication across many sectors, particularly shopping malls, hotels, educational institutions, hospitals and public organizations.

Instantly updated content, high-resolution visuals and videos capture the attention of target audiences while contributing to stronger customer engagement and brand awareness. Thanks to the centralized management system, all screens can be easily and efficiently controlled from a single point. With its sustainable and environmentally friendly structure, TOCHI Digital Signage makes your digital communication stronger, more effective and manageable through flexible solutions that adapt to the needs of different sectors.

Indoor Digital Signage Displays

Indoor Digital Signage Displays are designed to provide effective and uninterrupted digital communication in enclosed spaces. High-resolution display technology presents visual and video content vividly, clearly and attractively. **Product promotions, campaigns, information and directional messages** are delivered quickly, effectively and professionally.

- High Brightness and Resolution
- Fast and Easy Content Management
- 24/7 Continuous Operation
- Ultra-Slim Design
- Durable Structure

Indoor Digital Signage Display Applications

In today's digital world, indoor display solutions go beyond providing information; they strengthen brand communication, improve customer experience and add value to business communication processes. TOCHI displays make digital communication more effective and dynamic with a flexible structure that adapts to different sectors.

- Retail Stores
- Events, Entertainment & Organization Venues
- Restaurants & Cafés
- Tourism & Hospitality
- Beauty & Cosmetics
- Transportation Areas
- Educational Institutions
- Healthcare Institutions
- Offices & Corporate Spaces
- Banking & Finance
- Public Institutions & Organizations
- Real Estate, Residential & Living Spaces

Indoor Digital Signage Advantages

Attention-Grabbing Content Presentation:

Enables messages to be presented effectively and attractively with high resolution and dynamic content support.

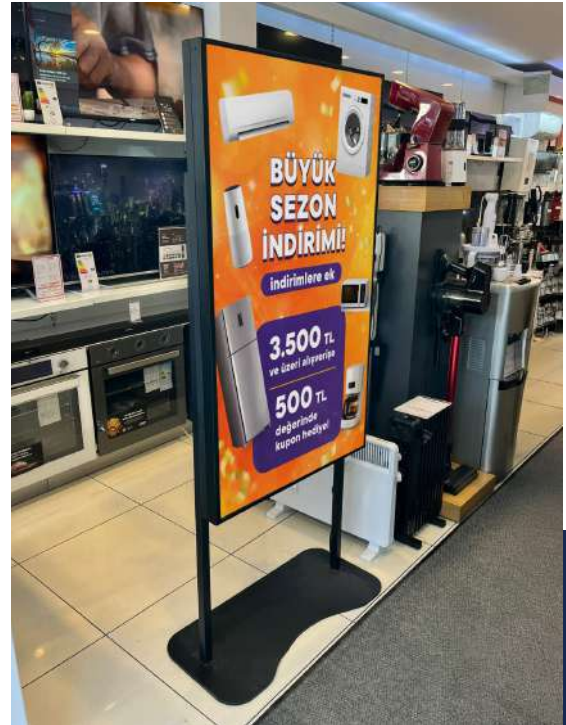

Easy and Fast Installation: Its portable design enables practical installation, making it an ideal solution for events and organizations.

Remote Content Management: Enables content to be updated remotely and quickly, providing flexible and effective communication.

Wide Range of Applications: Adapts to various communication needs across businesses, educational institutions, event venues, and different sectors.

Visual Impact & Brand Effect: Supports stronger and more memorable brand messaging through vivid colors, high image quality, and dynamic content.

Eco-Friendly & Sustainable: Reduces the need for printed materials and paper consumption while contributing to sustainable communication through its reusable structure.
